

RALLYMETER

NEW 9.3 OFFSET TOOL

Example Panda Raid 2017

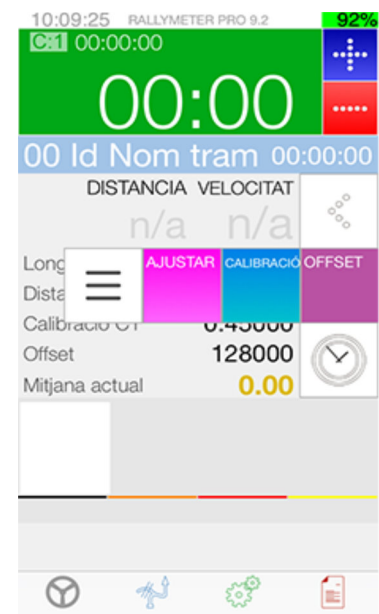

Leg 1. Mohamed V lake > Benni Tadjite (386km)

Organization gives us a roadbook with a complete leg including link section.

Special stage starts in 27830 instead of more common system where special stage starts from zero. This detail makes any intermediate references almost impossible to enter into Rallymeter without having to recalculate and note all partial distances.

| Pag. 03 | ETAPA 1 | LAGO MOHAMMED V > BENNI TADDJITE | Km total 386,70 |

| | 0,37 | | |
| 85 | 254,17 | | & PP CAP 220° |
| | 0,40 | | |

With this new Offset tool which you can access from main screen center menu button, you will be able to enter this 27830 distance as Offset so Rallymeter knows that this is not taken in account for the special stage average calculations.

Again, Rallymeter helps you make your rally simpler and more accurate.

ENJOY THE ROAD!
